4th CARDEMY Newsletter

may 2018

Once again Cardemy news...

Cardemy is a two-year European project which will create an innovative and high-quality training content, about Industry 4.0, where the acquisition of key skills for automotive industry workers are based in a Learning Factory model (new model of Vocational Education Training focused on the real industry needs, which pilots on workers' skills and competences within a real-world manufacturing environment).

What happens?

Units about industry 4.0 are now in a Beta test phase, translated in several languages: English, French, Spanish, German and Czech, before the last step: E-learning presentation. We hope to present all Units at the end of May. This is the first page about :

Meeting in Bochum.

On 23 to 25 of April, Partners met again, in Bochum (Germany), to prepare the last part of the project and to discover the Learning Factory, developed by the University of Bochum, in a totally new building, more than 1.300 m² of machines and tools.

University of Bochum is one of the most important University in Germany, with more than 60.000 students.

The staff of Learning Factory presented the concept and means by real exercises.

Then a meeting all the day welcomed by INCCAS and Bochum University let partners to organise all work till the end of the project.

The meeting with partners was fruitful, with first feed-backs from Beta-tests about learning units, up-grade the already done units, and decisions to optimize the project,

CARDEMY project is funded by European ERASMUS + fund.

Erasmus+

The Cardemy consortium

Five partners participate in the project, which is complementary in terms of nationalities, expertises and competences:
